

**BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA**

Application of Pacific Gas and Electric Company  
(U 39 E) for Authority to Increase Revenue  
Requirements to Recover the Costs to Replace  
Steam Generators in Units 1 and 2 of the Diablo  
Canyon Power Plant.

Application 04-01-009  
(Filed January 9, 2004)

**ADMINISTRATIVE LAW JUDGE'S RULING  
RECEIVING EXHIBIT INTO EVIDENCE**

On February 24, 2005, the Commission issued an interim decision in this proceeding. The decision contained a table of the net present value of revenue requirements results of the cost-effectiveness calculations. Scenarios 2, 3, 4 and 5 contained assumed tube degradation results of the last refueling outages for both units. Those results were not then available.

On March 17, 2005, I issued a ruling requiring Pacific Gas and Electric Company (PG&E) to provide cost-effectiveness calculations for Scenarios 3 and 4 using the actual tube degradation results of the last refueling outage for both units. The calculations were to reflect no changes to the decision, with the exception of the tube degradation results of these refueling outages. My stated intention was to make PG&E's response to the ruling an exhibit. The parties were given the opportunity to review the calculations, and object or comment as they saw fit. On April 8, 2005, PG&E filed its response to my ruling. No party has filed an objection to PG&E's response, or its receipt into evidence.

THEREFORE, **IT IS RULED** that the April 3, 2005 response of Pacific Gas and Electric Company (PG&E) to my March 17, 2005 ruling is marked for identification as Exhibit PG&E-31, and received into evidence.

Dated June 20, 2005, at San Francisco, California.
